Understanding and Evaluating Research: A Critical Guide shows readers how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.

KEY FEATURES:

- **A chapter on how the role of methodologies** plays into becoming a critical reader of research shows readers the difference between methodology and methods, and how the former influences scholarship.
- **Review and Engagement checklists**, which are strategically positioned throughout the chapters close to the respective content, help readers to assess the topics they are critically reading.
- **Special chapters on Argumentative Essays and Theory Papers** show how different types of scholarship cannot be judged using the criteria for a conventional research report.
- **Primer chapters on statistics** gives critical readers a basic understanding of statistical literacy.

TABLE OF CONTENTS:

PART I • INTRODUCTION

Chapter 1 • Critical Research Literacy

PART II • PHILOSOPHICAL AND THEORETICAL ASPECTS OF RESEARCH

Chapter 2 • Research Methodologies

Chapter 3 • Conceptual Frameworks, Theories, and Models

PART III • ORIENTING AND SUPPORTIVE ELEMENTS OF RESEARCH

Chapter 4 • Orienting and Supportive Elements of a Journal Article

Chapter 5 • Peer-Reviewed Journals

PART IV • RESEARCH JUSTIFICATIONS, AUGMENTATION, AND RATIONALES

Chapter 6 • Introduction and Research Questions

Chapter 7 • Literature Review

PART V • RESEARCH DESIGN AND RESEARCH METHODS

Chapter 8 • Overview of Research Design and Methods

Chapter 9 • Reporting Qualitative Research Methods

Chapter 10 • Reporting Quantitative Methods and Mixed Methods Research

PART VI • RESULTS AND FINDINGS

Chapter 11 • Statistical Literacy and Conventions

Chapter 12 • Descriptive and Inferential Statistics

Chapter 13 • Results and Findings

PART VII • DISCUSSION, CONCLUSIONS, AND RECOMMENDATIONS

Chapter 14 • Discussion

Chapter 15 • Conclusions

Chapter 16 • Recommendations

PART VIII • ARGUMENTATIVE ESSAYS AND THEORETICAL PAPERS

Chapter 17 • Argumentative Essays: Position, Discussion, and Think-Piece Papers

Chapter 18 • Conceptual and Theoretical Papers

“Understanding and Evaluating Research is a great resource with many examples to beginners and seasoned qualitative, quantitative, and mixed-methods researchers.”

— **Kadir Demir**, *Georgia State University*

“Sue L. T. McGregor provides what is missing in most textbooks on research methods—deeper explanations. New researchers will find detailed explanations of difficult-to-understand research concepts, and professors will find a wealth of teaching tools that can be tailored for each lesson. Few textbooks on research methods are so comprehensive and practical.”

— **Scott Greenberger**, *Grand Canyon University*
